SUMMARY

Software Engineer specializing in full-stack development and DevOps with proven experience delivering production systems for enterprise and commercial clients. Skilled in leading end-to-end projects, from architecture and development to CI/CD deployment on cloud platforms using modern web and mobile technologies. Recognized at a national level for project excellence with a track record of driving delivery across cross-functional teams.

TECHNICAL SKILLS

Programming Languages	: Python, JavaScript, TypeScript, Java, C, C++, C#
Frontend	: React, Next.js, HTML, CSS, Tailwind CSS, Bootstrap, Flutter, Blazor
Backend	: Node.js, ASP.NET Core, REST APIs, Spring Boot
Databases	: MongoDB, MySQL, PostgreSQL, Microsoft SQL Server, Firebase
DevOps & Cloud	: AWS (EC2, S3, IAM, SES), Docker, GitHub Actions, Linux
Tools & other	: Git, GitHub, AI/ML, IoT, Raspberry Pi, Figma, Postman, Swagger

INDUSTRIAL EXPERIENCE

Software Engineer & DevOps Intern

SLT Mobitel Digital Labs | 2024 - 2025

- Initiated and led **SecurePass AI** as **team lead**, an enterprise-level smart access management system powered by facial recognition and QR scanning, owning the project end-to-end from proposal writing, Figma UI/UX design and system architecture through to final production deployment.
- Developed 3 web applications using MERN Stack and Tailwind CSS, a mobile responsive User App for secure room access, an Admin App for managing users, doors and activity logs, and a multi-tenant Super Admin App for managing companies, admins and all user activities.
- Implemented CI/CD pipelines using GitHub Actions and Docker, cutting manual deployment time by ~70% and deployed applications on organization managed enterprise servers within Linux environments.
- Led a team of 4 Engineers, conducted weekly code reviews and delivered all milestones on schedule across a 6 month project lifecycle.
- Awarded Silver - National Project Management Excellence (NPME) Awards 2025** for Best Managed Project (Technology & IT Sector).

PROJECTS

Smart Hotel Management System (AI & IoT Integrated) | Wild Waves Safari Resort, Kumana

[Github](#)

Enterprise-level fully functional Smart Hotel Management and Monitoring System developed for both customers and the management sector including smart room controls with digitalized hotel operations, integrating Software Technologies with AI and IoT. Implemented deployment and automation using AWS and GitHub Actions.

Technologies: MERN Stack, Docker, AWS, Github actions, Tailwind CSS, IoT, Raspberry Pi

SecurePass AI - Enterprise Access Management System | SLT Mobitel PLC

securepass.sltdigitallab.lk

Led industrial enterprise level project requirements analysis, project planning, and high-level system architecture design leveraging Software, AI and DevOps technologies. Developed two core applications (user app and admin application). Worked as **Team Lead, Full-Stack Engineer** and **DevOps**

Technologies: MERN Stack, Docker, SLT Servers, Tailwind CSS

Multi-Tenant SaaS Point of Sale (POS) System

Github

Built a multi-tenant SaaS POS system using Spring Boot with role-based access (Super Admin, Admin, Branch Manager, Cashier), supporting company and branch-level data isolation, product management, billing, invoice and dashboard analytics.

Technologies: Java, Spring Boot, PostgreSQL, React, Tailwind, Rest APIs

POS, Inventory & E-Commerce System (Bakery Chain) | Cake O' Clock, Galle

Github

Developed POS, inventory management and e commerce platforms with mobile app support for bakery chain located in Galle. Delivered responsive web and mobile applications for online ordering.

Technologies: ASP.NET Core, Blazor, Flutter

JustNotepad | Cloud based lightweight Notepad

justnotepad.chatd.dev

Cloud-based web application for creating, editing, and organizing notes efficiently. Implemented separate User and Admin modes with secure authentication and deployed on AWS using CI/CD with GitHub Actions.

Technologies: MERN Stack, AWS (EC2, S3), Github Actions, Google OAuth

BookFair Stall Management System | Microservices-Based Application

Github

Developed a microservices-based system for book fair operations, enabling modular backend services with inter-service communication via REST APIs.

Technologies: MERN Stack, Java Spring Boot, REST APIs, Apache Kafka

LetsChat | Cloud-Based Mobile Chat Application

Github

LetsChat is an online mobile chat application characterized by cloud-based functionality, featuring user authentication and the implementation of secure login via mobile number with OTP verification.

Technologies: Flutter, Firebase, Dart

EDUCATION

BSc. Engineering (Hons) in Computer Engineering

Faculty of Engineering, University of Ruhuna | 2021 – 2025

GCE Advanced Level - Physical Science | 2019

Bandaranayake College, Gampaha

GCE Ordinary Level | 2014

Bandaranayake College, Gampaha

CERTIFICATES

AWS Cloud Technical Essentials

Amazon Web Service | 2026

[Verify](#)

Supervised Machine Learning: Regression and Classification

Stanford University | 2024

[Verify](#)

React Basics by Meta

Meta | 2024

ADDITIONAL INFORMATION

Languages

:

English, Sinhalese (Native)

Volunteer Experience :

Mehewara Programme (2023) : Conducted workshop series for Ordinary Level students.

XbotiX Robotics Workshops (2023) : Delivered introductory sessions on Robotics and Arduino for School Students
